Dear Ms. Harkins:

RE: DRAFT ENVIRONMENTAL IMPACT STATEMENT FOR THE COLORADO RIVER INTERIM SURPLUS CRITERIA

This transmits New Mexico Environment Department (NMED) comments concerning the above-referenced Draft Environmental Impact Statement (DEIS).

The DEIS describes alternatives for managing water stored in Lakes Mead and Powell. The alternatives are criteria for determining whether a surplus of water is stored in either of the reservoirs. Identification of a surplus may trigger a release, and the timing and nature of releases may influence surface water resources including aquatic life downstream of Glen Canyon Dam.

1 The NMED concurs with the Bureau of Reclamation that it is appropriate that, because operation of upper basin reservoirs (upstream of Lake Powell) is independent of Lake Powell, the "northern [upstream] limit of the potentially affected area under consideration in this DEIS is the upper reaches of Lake Powell" (DEIS, p. 3.2-1). The affected area is therefore beyond the jurisdiction of the NMED.

1: Comment noted.

We appreciate the opportunity to comment on this document. Please let us know if you have any questions on the above.

Sincerely,

PETER MAGGIORE
SECRETARY
